Kevin Nathaniel Arsenal

WEB DEVELOPER

WORK EXPERIENCE

FRONT-END DEVELOPER – FUNCTIONEIGHT

September 2024 – Present

- **WordPress Development** – Built fully customized WordPress websites for new clients, aligning each project with brand identity and functional requirements.
- **Bug Fixing & Performance Optimization** – Diagnosed and resolved technical issues on existing sites while implementing design refinements and performance improvements.
- **Website Maintenance**– Managed monthly maintenance tasks of multiple Wordpress websites, including plugin and theme updates to ensure security, stability, and compatibility.
- **Content Management** – Performed routine content updates such as blog publishing and site content management across multiple WordPress websites.
- **Visual Asset Creation** – Produced visual assets, including images and creative materials, to support website and campaign requirements.
- **Cross-Stack Contributions** – Delivered targeted revisions and enhancements to Laravel/ReactJS and Laravel/VueJS projects, supporting multi-framework development initiatives.
- **Attention to Detail & Efficiency** – Maintained high standards of quality across design, functionality, and cross-platform implementations.

FRONT-END DEVELOPER – GLOBMOBI

June 2023 – September 2024

- **UI/UX Collaboration** – Worked closely with designers to translate high-fidelity mockups into polished, responsive WordPress websites.
- **WordPress Development** – Built and customized websites with a focus on performance, responsiveness, and visual consistency.
- **Rich Media Creative Development** – Developed interactive and visually engaging rich media assets for digital campaigns.
- **Brand-Centric Implementation** – Ensured all web and creative outputs aligned with client branding, goals, and target audience requirements.
- **Product Representation (VICI)** – Contributed to campaign materials supporting VICI, a fully personalized advertising solution delivering tailored marketing experiences.

JUNIOR DEVELOPER – MOONE GLOBAL

June 2023 – November 2023

- **Next.js Development** – Built modular, reusable components to support scalable and maintainable frontend architecture.
- **Figma-to-Code Implementation** – Translated design mockups into responsive, interactive web interfaces with attention to UI/UX fidelity.
- **Full-Stack Exposure** – Contributed to both frontend and backend development for a key module, demonstrating versatility across the stack.
- **Collaborative Team Work** – Operated as one of two core developers, taking ownership of major features and technical decisions.
- **Code Quality Focus** – Emphasized component reusability, clean structure, and performance in application development.
